

## **Important Notice for Passenger Travel to the United States**

The U.S. Center for Disease Control (CDC) is expected to issue an order requiring all carriers that fly to the United States to collect and transmit the CDC 5 data elements from **all US-bound passengers** for contact tracing purposes (e.g., passenger’s name/contact information, etc.)

For the above reason, EVA Airways strongly recommends our travel partners to collect the following data when making reservations for all US-bound passengers beginning **September 1, 2020** to avoid any unexpected issues with passenger bookings:

- 1. Address while in the US (SSR DOCA), and**
- 2. Primary mobile number and Email address in APN, and**
- 3. Secondary telephone number in AP.**
